

School Year: 2021-2022

Dear Parents:

The New Jersey Department of Health and Senior Services (DHSS) has revised the immunization requirements. They have made some additions to the previous mandated vaccines. They are as follows:

1. Students entering Preschool (ages 3 & 4) at HollyDELL in September 2021 must have:
  - 1 dose of pneumococcal conjugate vaccine (PCV) after their first birthday, but before September 1, 2021.
  - 1 dose of flu vaccine between September 1, 2021 and December 31, 2021. This is required each fall during their preschool years.
2. Students entering 6<sup>th</sup> grade or ages 11 & 12 must have:
  - 1 dose of Tdap given no earlier than their 10<sup>th</sup> birthday or when 5 years has elapsed since their last documented DTP/DTaP or Td dose.
  - 1 dose of meningococcal vaccine (meningitis)

Students are required to be up to date with these vaccines as per New Jersey State Mandate. **No students are permitted to enter or remain in school without documented proof of the vaccinations. Please plan to see your doctor for these vaccines.**

If you have questions, please free to call.

Thank you.
